GO Biological Process − upregulated
leukocyte cell−cell adhesion
chemotaxis
taxis
lymphocyte differentiation
regulation of T cell activation
regulation of hemopoiesis
regulation of immune effector process
positive regulation of cell activation
regulation of leukocyte cell−cell adhesion
leukocyte migration
positive regulation of leukocyte activation
leukocyte proliferation
immune response−regulating cell surface receptor signaling pathway
mononuclear cell proliferation
lymphocyte proliferation
positive regulation of lymphocyte activation
regulation of leukocyte proliferation
regulation of mononuclear cell proliferation
regulation of lymphocyte proliferation
T cell proliferation
